P00 -- Design Doc

2022-10-27

time spent: 0.5 hr

Program Components:

- HTML forms: collect user input so users can contribute to wiki.
- Sqlite Database: store user input so it can persistently be displayed on webpage
- Flask: Web Server/Delivery Framework

What it will look like:

- Main page shows names of editors, which also link to their wiki.
- Main page also contains a “create a wiki” button that brings the user to the “create a wiki” page. Users have to submit their name and contents of their wiki.

Plans/TODO:

- Python, HTML for main page, and Flask (2-3 days)
- “Create a wiki” page and SQL (3 days)
- Link the created wiki to main page, testing, debugging (1 day)
