P00: Move Slowly and Fix Things
2022-10-30
time spent:

Scenario One: storytelling game/website

Components:
- HTML (contents of web page)
- SQLite (database for storing information)
- Flask

Details:
- Home Page
  - Has login/signup
  - Description or instructions or sample stories
- Login Page/Register
  - If the user has an account, username exists in db and password matches what is stored, directs user to landing page with previous stored stories.
  - If the user does not have an account, username not found in db, send to (signup.html) and store username and password in the db.
- Landing Page
  - Displays the existing stories or option to start a new one.
  - Start a new story: additional html file with title, author
  - Continue with existing story:

Component Map:

```
                    ┌─────────────┐
                    │    Home     │
                    └─────────────┘
                           │
                    ┌─────────────┐
                    │   Login     │
                    │   Page      │
                    └─────────────┘
```
